Library of Congress Control Number (LCCN): 2012912261 The main body of this second edition serves as the counselor training and examination manual of the College of Mental Health Counseling and gives away the secrets of effective counselors and therapists. The practical skills and concepts distilled in the present form, are the contributions of countless colleagues and clients who over the years have challenged the creative energies of the author. Effective Counseling Skills is designed to achieve the primary purpose of making counseling skills public knowledge in the belief that the health of society is improved when counseling is known to the most people. The style of the manual is conversational with numerous examples of the practical wording of therapeutic statements. Major topic areas in the main content include an explanation of the client's personal history, suicide prevention, how to begin and deepen the counseling process, helping the client learn healthy ways of relating, moving the client from childhood to maturity, skills for healing grief, and working with couples who want to make progress with issues of conflict, infidelity, addiction, and other common problems. Practical ways to build and manage a counseling practice are presented. A detailed index and table of contents make the volume easy to use as a guide for both the practitioner as well as people seeking help.

Essential Counselling Skills: Practice and Application Guide offers practical, step-by-step guidance for developing and applying the skills necessary for careers in counseling. Using the metaphor of a professional journey, this guide provides commentary and background information throughout, as readers are directed in their development of such key counseling skills as empathy, building relationships, case conceptualization, and facilitating change. Deep reflection is further encouraged at every key stage through the integration of theory with a wealth of applied exercises and examples.

The Counseling Skills Practice Manual is a practical guide for students who are working on improving their counseling skills. Designed as a companion to The Essential Counselor and its accompanying DVD of professionally demonstrated skills, this manual works directly with the student, offering a discussion of each skill set along with examples and practice exercises. The manual features 12 practice sessions, each of which focuses on a specific counseling skill set. Many of the essential skills are covered, such as using questions, nonverbal behaviors, making reflections of client meaning, and feeling. But the student also gains practice here with other important skills, such as learning how to deal with clients in crisis and reluctant clients, how to appropriately confront, and how to give and receive accurate and supportive feedback to one another. These practice sessions are designed to help the students recognize and build upon their natural interpersonal skill set as they learn new skills. They will help students become more competent in their use of counseling skills and feel more comfortable and confident in their roles as emerging counseling professionals.

Practical Counselling and Helping is a practical, jargon-free guide to counselling. It offers clear information about how counselling and helping may be put into practice, whilst acknowledging and discussing its limitations. Contents include: * what is counselling and helping? * basic counselling and helping strategies * handling difficult situations * further personal development. Drawing from a range of counselling methods, and offering a useful and detailed reading list, Practical Counselling and Helping will appeal to all students in the health professions and to all those professionals requiring a clear account of how they might improve their own communication skills.

Conveying the reality of the counselling room, this book provides helpful tips and techniques to enable practitioners to develop and refine their skills. At the heart of this book is the idea of 'situated action'. By this we mean suspending purely intellectual faculties and exploring a different kind of intelligence - one shaped in the real world - in essence what happens to theory when it meets real life. This book offers thirty four skills to achieve this kind of practice wisdom which contain a mixture of reflection, client stories, quotes and images. This text will translate theory into practice for students and be a source of inspiration and reflection for the experienced practitioner.

Counselling skills are very powerful. Really listening and providing compassionate empathy without judging is a core part of social work practice with service users. This book provides a theoretically informed understanding of the core skills required to provide counselling interventions that work. It provides detailed discussion of three core skills which are identified as: talking and responding, listening and observing and thinking. Over 11 chapters these core skills are described in terms of what they mean, how they can be learned and developed, how they can be used and misused and, most importantly, how specific skills can be employed in a coherent and evidence-informed counselling approach. Loughran also looks in detail at the skills required to deliver interventions consistent with three approaches: Motivational Interviewing, Solution-Focused Work and Group work. Illustrative case examples and exercises offer further opportunities for reflection and exploration of self-awareness as well as for practising and enhancing skills development, thus making the book required reading for all social work students, professionals looking to develop their counselling skills and those working in the helping professions more generally. Terms such as social worker, therapist and counsellor will be included as they inform counselling skills in social work.

'As a course book or an aide to individual learning this book contains a wealth of information and guidance based on years of study and practice. It is easy to use because it is clearly signposted. I particularly like the way the author addresses the range of issues a student needs to consider before embarking on a counselling course.
