Creating Photomontages With Hop A

"I started wanting to make art that was actually related to what was going ... Early on the book, Kennard recalls the time the Barbican had asked to remove two of his photomontages created in response ...

Photographer Mike Schreiber has worked with some of hip hop's biggest names, capturing them for all the world to see. His humanistic approach to life and work is reflected in these mostly black and white photographs. His photos capture the true essence of hip hop cultures and perspectives with an end result that is refined yet undeniably honest in its raw and gritty tone. Because Schreiber's personal approach is so palpable in the photographs, True Hip Hop also features Schreiber's stories about these shoots, revealing everything from anecdotes about the artists to technical details and trade secrets.

"George DuBose began his work with NYC's Hip Hop artists at the very beginning. When he heard the first Hip Hop hits, he thought it was part of New Wave music. It was a wave alright, a tidal wave that swept the country. This book traces his work with Afrika Bambaataa, Biz Markie, Kane, G. Rap, Roxanne Shanté, MC Shan, Masta Ace, Man Parrish, The Genius aka GZA, Craig G, Marley Marl, Grand Dady 1U, King Sun, MC Jay and Thomas Ontime of 2 Deep, Run-DMC, The New York City Breakers, XCLAN, Mobb Deep, Rammellzee, Shelley Thunder, Scoob and Scrap, Double J, Bootsy Collins and The Notorious B.I.G. In all, DuBose has created more than 300 album images and designs and over 50 of his projects have achieved gold status. BonaFide magazine (UK) called DuBose 'the godfather of Hip Hop photography'. This is not a Hip Hop history nor a 'how-to' photography book. It is the stories behind the concepts and actualization of images that have been used for these artists' album covers. The book is full of color images that illustrate the covers and cd booklets and also there are many 'out-takes' from these photo sessions that fans have never seen. Hopefully, the reader will learn more about his favorite artists and discover some new artists that they are unaware of."-Publisher.

The Routledge Handbook of Language and Creativity provides an introduction to and survey of a wide range of perspectives on the relationship between language and creativity. This innovative text recounts the history of photography through a series of thematically structured chapters. Designed and written for students studying photography and its history, each chapter approaches its subject by introducing a range of international, contemporary photographers and then contextualizing their work in historical terms. The book offers students an accessible route to gain an understanding of the key genres, theories and debates that are fundamental to the study of this rich and complex medium. Individual chapters cover major topics, including: · Description and Abstraction · Truth and Fiction · The Body · Landscape · War · Politics of Representation · Form · Appropriation · Museums · The Archive · The Cinematic · Fashion Photography Boxed focus studies throughout the text offer short interviews, curatorial statements and reflections by photographers, critics and leading scholars that link photography's history with its practice. Short chapter summaries, research questions and further reading lists help to reinforce learning and promote discussion. Whether coming to the subject from an applied photography or art history background, students will benefit from this book's engaging, example-led approach to the subject, gaining a sophisticated understanding of international photography in historical terms.

With Photoshop it's possible to create a wide range of models and also import models in a range of popular 3D formats. And with the release of Adobe Photoshop CC, all the 3D features are available now to anyone who uses Photoshop, including the ability to print 3D objects directly out of the program. Using a project-based approach similar in style to his popular book on this topic, author Steve Caplin will show users how to build 3D objects and manipulate them in 3D space right away. Rather than pontificate on a minefield of unfamiliar terms, he gives viewers practical, hands-on demonstrations with downloadable lesson files so users unfamiliar with 3D concepts can follow along and understand the theory of 3D by seeing it in practice. Topics include shaping, editing, inflating, and revolving objects; rendering, lighting, and placing materials; creating refraction, reflection, and transparency; combining models with photos; using multiple objects in a scene, and many, many more. This video will go beyond modeling in Photoshop and will also demonstrate how to refine, preview, and output 3D creations using 3D printers. The video is wrapped in a unique interface that allows you to jump to any topic and also bookmark individual sections for later review. The unique "Watch and Work" mode shrinks the video into a small window to allow you to work alongside in the software. Project files used in the lessons are included on the disc so you can practice what you've learned, and interactive review questions help reinforce freshly gained knowledge. Duration: 3 HR (User Level: Beginning/Intermediate) Closed-Captioning in English System Requirements: Mac OS X 10.6, Microsoft Windows XP, or higher 1 GHz processor or higher 2 GB RAM or higher 1 GB Free HD Space (does not include lesson files) Hardware: DVD-ROM drive (Please Note: [i] This DVD-ROM can be viewed on your computer, but it will NOT play in a DVD movie player. The concept of self-esteem is a fixture in the psychological and moral landscape of American society. This is especially true in the arena of childrearing: images and references to self-esteem are ubiquitous in academic, educational, and popular media. Yet, until now, little has been known about what self-esteem means to parents or how self-esteem infiltrates everyday practices. Self-Esteem in Time and Place reveals how self-esteem became a touchstone of American childrearing in the early years of the 21st century. At the heart of this book is the Millennial study, an empirical investigation of diverse families in one Midwestern town. European American, African American, middle-class, and working-class parents of young children embraced self-esteem as a childrearing goal and believed that fostering children's self-esteem was critical to their psychological health and future success. To achieve this goal, they enacted a high maintenance style of childrearing comprised of assiduous monitoring, copious praise, and gentle discipline. These practices differed dramatically from most cultural cases in the ethnographic record. Together, parents and children created an early moment in a child-affirming developmental trajectory. Three-year-olds developed a precocious ability to praise themselves and solicit praise from others. As active participants and inventive agents, children and parents alike engaged in a process of personalization, nuancing their views in light of their social positioning and infusing normative ideas and practices with personal significance. The result is an account of unparalleled depth and nuance that situates childrearing and self-esteem in time and place, traces its roots to 19th century visionaries, and identifies the complex, multi-layered contexts from which this enduring cultural ideal derives its meanings.
