In English it takes two words to say "law" and "religion" and those two words carry two different bundles of meaning. In Arabic and Turkish, traditionally one word, *din*, meant both. Splitting or uniting the ideas and assumptions behind those words makes an enormous difference in the way society functions. But were Christianity and Islam really that different from their beginnings? Have they changed over time? Are they more like or unlike each other today? Can they coexist in peace or must conflict and violence continue? And is violence or terrorism required, or can it be reformed away? The ways in which Christianity and Islam each began starts answering these questions, and obscure historical events like the Papal Revolution and the Mihna help too. The unconscious assumptions of the modern West as it invaded the Middle East both militarily and culturally provide answers as well, and so do the differing reactions within Islamic societies. Looking at these divergent historical paths helps expose the hidden assumptions causing Christians and Muslims to misunderstand each other today. This is not an easy book to read. Given the subject matter, it can't be. Hopefully it will reward the reader with insights into today's issues. More than that, it should bring hope as we meet many Muslims working to correct what they see as wrong interpretations of Islam and to reform Islam.

THIS BOOK DOESN'T CONTAIN ANY ARABIC LETTERS! ALL ARABIC WORDS IN THIS BOOK WERE WRITTEN IN ENGLISH-TRANSLITERATION! Have you always wanted to learn how to speak the Yemeni Arabic dialect but simply didn't have the time? Well if so, then, look no further. You can hold in your hands one of the most advanced and revolutionary method that was ever designed for quickly becoming conversational in a language. In creating this time-saving program, master linguist Yatir Nitzany spent years examining the twenty-seven most common languages in the world and distilling from them the three hundred and fifty words that are most likely to be used in real conversations. These three hundred and fifty words were chosen in such a way that they were structurally interrelated and, when combined, form sentences. Through various other discoveries about how real conversations work—discoveries that are detailed further in this book—Nitzany created the necessary tools for linking these words together in a specific way so that you may become rapidly and almost effortlessly conversant—now. If your desire is to learn complicated grammatical rules or to speak perfectly proper and precise Arabic, this book is not for you. However, if you need to actually hold a conversation while on a trip to Yemen, to impress that certain someone, or to be able to speak with your grandfather or grandmother as soon as possible, then the Nitzany Method is what you have been looking for. This book is recommended for those who already have some prior knowledge of the pronunciation of Arabic accents (such as the Arabic accents: *ayin*, *ghayn*, *ha*, and *khaf*). For those of you who do not, this book does indeed provide some great, in-depth techniques on the pronunciation and recognition of these accents, that you will encounter throughout the program. These techniques have proven extremely beneficial for beginner students who were previously unfamiliar with these accent pronunciations. But keep in mind this isn't a pronunciation book! Yemeni Arabic encompasses three slightly different dialects, the San'ani, Ta'izzi-Adeni (also called South Yemeni Arabic or Djibouti Arabic), and Hadhrami. The one in this book is the San'ani dialect, which is the dialect of the capital Sanaa. Keep in mind that Yemeni Arabic is not an official language, but rather is a colloquial dialect. The purpose of my method is solely to give you the tools to create your own sentences in order to become conversational, while in regards to grammar, pronunciation, etc., you are on your own! This method is designed for fluency in a foreign language, while communicating in the first person present tense. Nitzany believes that what's most important is actually being able to understand and be understood by another human being right away. Therefore, unlike other courses, all words in this program are taught in English transliteration, without having to learn the complex alphabet. More formalized training in grammar rules, etc., can come later. This is one of the several, in a series of instructional language guides, the Nitzany Method's revolutionary approach is the only one in the world that uses its unique language technology to actually enable you to speak and understand native speakers in the shortest amount of time possible. No more depending on volumes of books of fundamental, beginner, intermediate, and advanced levels, all with hundreds of pages in order to learn a language.
