Jones and George are dedicated to the challenge of "Making It Real" for students. As a team, they are uniquely qualified to write about the organizational challenges facing today's managers. No other author team in the management discipline matches their combined research and text-writing experience.

Essentials of Management concisely surveys current management theories and research. Through a variety of real world examples from small, medium, and large companies the reader learns how those ideas are used by practicing managers. The organization of this text follows the mainstream functional approach of planning, organizing, leading, and controlling; but the content is flexible and encourages instructors to use the organization they are most comfortable with. The themes of diversity, ethics, and information technology are clearly evident through in-text examples, photographs, "unboxed" stories, and the end-of-chapter material - all areas of importance that truly serve to bring to life the workplace realities that today's student will encounter in the course of a career.

For undergraduate and graduate MIS courses. This title is a Pearson Global Edition. The Editorial team at Pearson has worked closely with educators around the world to include content which is especially relevant to students outside the United States. This edition gives An in-depth look at how today's businesses use information technologies. Many businesses look for candidates who know how to use information systems, making a general understanding of information systems an asset to any business

student. Laudon and Laudon continue to define the MIS course for all business majors by emphasizing how business objectives shape the application of new information systems and technologies. The ninth edition focuses on currency and cutting-edge topics.

Introduces the processes of new venture creation and the critical knowledge needed to manage a business once it is formed. This text offers complete coverage and a practical hands-on approach to entrepreneurship. Supported by supplementary material for the lecturer and student in both a CD-Rom and companion website.

With the decline in new aircraft deliveries, ownership, and facilities has come a similar decline in general aviation operations, pilot certification, and sales at fixed base operators (FBOs). It is clear that, because of the challenges faced by the industry, FBOs must be well-managed to survive. Written from the academic and practical aviation experiences of the authors, this text provides the analytical tools that will assist the manager of the aviation service business who wishes to capitalize on these challenges and opportunities. It is intended to serve both undergraduate and graduate academic audiences, as well as to be a practical reference for the individual in industry. Also included are links to additional trade and industry materials, many of which are available on the Internet from a host of professional organizations, to supplement the text.
