The FireEye CM, FX, EX, and NX Series Appliances provide extensive auditing capabilities. The TOE generates a comprehensive set of audit logs that identify specific TOE operations. For each event, the TOE records the date and time of each event, the type of event, the subject identity, and the outcome of the event.

FireEye CM, FX, EX, and NX Series Appliances

The FireEye CM series is a group of central management platforms that consolidate the management, reporting, and data sharing of the FireEye NX, EX, FX, and AX products. The easy-to-deploy, network-based CM platform locally distributes threat intelligence, auto-generated from the FireEye deployment, in real time helping the entire organization stop targeted attacks.

FireEye Central Management CM Series | ThreatProtectWorks.com

FireEye File Protect (FX Series) products help prevent, detect and respond to cyber attacks by scanning file content for signs of malicious threats. These threats might be brought into an organization from outside sources, such as online file sharing services and portable file storage devices.
