Dogs are a part of nearly 40 percent of United States households. With this in mind, author Linda P. Case has written the definitive textbook on dogs and their care. Completely updated and revised, the second edition of The Dog covers four areas of compelling interest: the bond between dogs and humans, canine behavior, canine health and disease, and canine nutrition. Aiming to enhance the human-dog bond, author Case uses clear, understandable writing to explain selective breeding, training principles, solution to common behavior problems, diet and nutrition, and preventative health care. Case liberally uses distinctive figures and tables, current references plus suggested readings, and a thorough glossary to aid in comprehension. More in-depth than most dog books, The Dog will prove to be an indispensable tool for undergraduate companion animal courses, veterinary technician courses, and dog care/training courses. In addition, it will serve as a valuable resource for professional breeders, trainers, exhibitors, and veterinary clinicians.

Following critical acclaim for the first and second editions of Skin Diseases of the Dog and Cat, this new third edition has been thoroughly updated while preserving the inherent strengths of the book. The practical handbook takes a problem-oriented approach, with 13 chapters covering dermatoses classified by their principle presenting sign, including a brand new chapter on diseases of abnormal keratinization and scaling. • A concise, systematically structured text covering definition, aetiology and pathogenesis, clinical features, differential diagnoses, diagnostic tests, and management. • The focus is on clinical practice and the need to explain the disease to the owner • Superb and generously sized colour photographs and diagrams • The clear user-friendly design shows one condition per page or spread of pages • Referenced throughout to give the clinician access to the literature The resulting book is practical, extensive and up-to-date in its content, as well as being beautifully illustrated and designed.
