The workbook, updated to reflect the eight edition text, contains perforated, performance-based assignment and evaluation sheets. The assignment sheets help students review what they have learned. The evaluation sheets provide criteria or standards for judging student performance for each procedure in the text. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

\*\*This is the chapter slice "The Muscular System - Muscles" from the full lesson plan "Cells, Skeletal & Muscular Systems"\*\* What do cells, bones and muscles have in common? They are all part of the human body, of course! Our resource takes you through a fascinating study of the human body with current information written for remedial students in grades 5 to 8. We warm up with a look at the structures and functions of cells, including specialized cells. Next, we examine how cells make up tissues, organs and organ systems. Then the eight major systems of the body are introduced, including the circulatory, respiratory, nervous, digestive, excretory and reproductive systems. Then on to an in-depth study of both the muscular and skeletal systems. Reading passages, activities for before and after reading, hands-on activities, test prep, and color mini posters are all

included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.

Start your journey into the human body with cells, bones and muscles. Our resource takes you through a fascinating study of anatomy with current information. Begin with cells, the building blocks of life. Build your own cell by sculpting the different parts. Move into tissues, organs and systems to discover all the different systems that make the human body function. Next is the skeletal system. Invent your own alien skeleton using the different bones found in the human body. Understand that these bones are held together with joints and cartilage. Finally, end this part of the journey with the muscular system. Find out the difference between skeletal, smooth and cardiac muscles before identifying voluntary and involuntary muscle movement. Aligned to the Next Generation State Standards and written to Bloom's Taxonomy and STEAM initiatives, additional hands-on experiments, crossword, word search, comprehension quiz and answer key are also included.

This is the ultimate guide for test takers preparing for their licensing exam. This study guide includes several books in the convenience of one. The first section is comprised of test questions
