Photography for Beginners (The Ultimate Guide in 2020)
Looking for the light is one of those beginner photography tips that sound constraining, but with practice, it will become second nature. You will automatically find yourself thinking about light and shadow and how to create the best composition without resorting to that pop-up flash. It ' s also one of the most impactful things you can do to differentiate your photos and make people think twice when considering you as more than just an amateur.

First of all, find the flash settings in your camera ' s menu
and reduce brightness as much as you can. Second, you can
try diffusing the light from the flash by putting something
over it. Securing a piece of paper or opaque scotch tape over
the flash, for instance, can help diffuse the light and soften it.
