Rehabilitation enables people with traumatic brain injuries to reach and maintain optimal functioning levels in areas such as intellect, sensory, physical and social behaviour. Traumatic brain injuries can affect many aspects of a person's life; therefore, it is important to assess the benefits of inpatient rehabilitation.

Traumatic Brain Injury: Rehabilitation for Everyday ...

Rehabilitation after traumatic brain injury improves outcomes. However, questions remain over the timing and dose of rehabilitation. There is compelling evidence from animal studies that commencing intensive rehabilitation in the earliest phase of injury when the brain appears to be uniquely sensitive to adaptation, the so-called 'plasticity window', leads to much better outcomes.

Physiotherapy Management of Traumatic Brain Injury ...

Traumatic brain injury causes many cognitive, emotional, and physical side effects that can be difficult to live with. Medications can often help take the edge off these symptoms and allow patients to function again. However, while they can help promote recovery, they are no substitute for the hard work of consistent therapy.
